

THE KEY OF TRAINING SUCCESSFUL STUDENTS

In our fast-changing world, students require a variety of skills. They need to have a sense of responsibility, a capacity for self-guidance and the skills to seek new opportunities in job markets. Students need to be creative and active, as well as co-operative in their approach to studies and their future work life. Fortunately, these skills can be learned.

It is all about developing an
entrepreneurial mindset!

This is the key for personal,
academic and social success!

OUR SOLUTION

SKILLOON fosters an entrepreneurial mindset in its student participants. It works like a personal trainer for students. A series of concrete tasks orientates students towards working life and towards developing new businesses. SKILLOON is research-based platform that offers reliable and valid evaluation tools for entrepreneurial learning. Students implement their own personal development portfolio called LOGBOOK that may be used for course assignments. **With SKILLOON, teachers and mentors guide students towards the skills they will need in the 21st century.**

OUR EXPERTISE

Finland is well known for its expertise in educational development. SKILLOON has been developed in cooperation with several Finnish schools, universities and research groups, and involves a high degree of international cooperation. We are proud recipients of the Finnish National Agency of Education's quality label and being of its official education partner. The Agency is also funding national SKILLOON development in Finland. Meanwhile, the Finnish Ministry of Education and Culture implemented SKILLOON in the latest national strategy for entrepreneurship education.

skilloon

A STUDENT'S PERSONAL TRAINER FOR SUCCESS!

WWW.SKILLOON.COM

HOW DOES IT WORK?

For students

- Registration
- Answering a school and self-evaluation questionnaire
- Immediate personal feedback
- Personal recommendations for future actions
- Concrete and varied tasks for the following weeks
- Earning points
- Personal portfolio development – called LOGBOOK

For teachers and mentors

- Registration
- Concrete guidance on how to set up SKILLOON use for a group of students.
- Visible data showing students' evaluations and processes in action
- Opportunities to choose ready-made assignments according the needs of each group and the aims of courses
- Tasks to activate groups and the school community
- A practical tool to support personal online mentoring
- Using SKILLOON as a course assignment
- A concrete platform for teachers/mentors to promote student-centred learning grounded in modern learning concepts and up-to-date research - focusing on 21st century skills
- IDEA BOOKLET - concrete pedagogical ideas on how to use SKILLOON in class settings and for student counselling/mentoring

RESULTS

Students

- Develop an entrepreneurial mindset, as well as goal setting and self-guidance skills – better school results
- Become more active and more cooperative
- Develop their self-esteem
- Become more motivated
- Are orientated towards working life and future studies
- Take action in developing new concrete business ideas

Teachers and mentors

- Implement a concrete pedagogy for entrepreneurship education
- Develop students' learning skills
- Achieve better academic results by using digital solutions
- Motivate students in their studies and orientate them towards working life
- Implement learning that is motivating and fun!

Schools

- Foster an entrepreneurial, innovative and motivating learning culture
- Use new digital solutions in a meaningful way to enhance students' personal, entrepreneurial and academic development
- Lead the way in using the latest digital pedagogy that is grounded in up-to-date research
- Become forerunners among the education institutions focused on entrepreneurial learning

“SKILLOON is something that we’ve been waiting for in education. It is more than learning material. It is a learning environment supporting students’ self-evaluation, self-guidance and self-esteem. It has concrete tasks that will help students in their future working life.

I am using SKILLOON for student counseling. My colleague uses it for business courses. There are a wide variety of ways to use it.

You can just adjust SKILLOON to your purposes. And tailoring it to suit your needs doesn’t take much time.”

– Antti Ahonen, Student counselor and teacher trainer from Finland, who has been teaching and mentoring students for over 25 years.
